

OPTIMIPRINT

Smart and secure cloud print management for modern organisations of all sizes.

- Protect sensitive documents and company data with secure print release and end-to-end encryption, from the user's workstation to the printer.
- Send documents to secure pull print queue and release them on any device using the mobile app or built-in interface. Fast, simple, and always available.
- Say goodbye to print servers and eliminate the need for expensive hardware and ongoing maintenance.
- Gain full visibility into your printing operations, see exactly what's being printed, by whom, and at what cost.
- Reduce expenses by limiting colour usage and eliminating unnecessary prints.
- Manage all printers, users, and networks from one web interface.
- Personalised printer deployment with restrictions for colour and simplex printing, based on user, department, or location.
- Automatic distribution and updates of print devices on workstations.
- Secured cloud pull printing or direct release on device.
- Printing from user cloud storage and company archives.
- Print from Windows, MacOS, iOS, Android, Chromebooks and VDI.
- Eliminating local print servers helps conserve energy and significantly lowers CO2 emissions.
