TEST REPORT EST Technology Test program for Erp(Directive 2009/125/EC) requirements for electronic display	
Report Reference No	ESTS-G23051010
Tested by (+ signature).....	Joker Li/Engineer
Approved by (+ signature)...	Jimmy Liang/ Reviewer
Applicant.....	Shenzhen KTC Commercial Display Technology Co., Ltd
Address.....	The B district of the first floor,third floor and fourth floor, 1# Building,NO.4023, Wuhe Street, Bantian, longgang District, Shenzhen City, Guangdong Province, China
Manufacturer.....	Sharp NEC Display Solutions, Ltd.
Address.....	4-28, Mita 1-chome, Minato-ku, Tokyo,108-0073 Japan
Factory.....	See page 2
Address.....	See page 2
Description.....	LCD MONITOR
Model No.....	E988
Trade mark.....	NEC
Rating.....	Input: 100-240V~, 50/60Hz, 3.9-1.6A;
Test Result.....	PASS
Sample receipt date.....	May 10, 2023
Date(s) of Test.....	May 13, 2023
Date of Issue.....	June 13, 2023
Test procedure.....	☒ COMMISSION REGULATION (EU) 2019/2021 of 1 October 2019 ☒ COMMISSION DELEGATED REGULATION (EU) 2019/2013 of 11 March 2019 ☒ COMMISSION REGULATION (EU) 2021/341 of 23 February 2021 ☒ COMMISSION DELEGATED REGULATION (EU) 2021/340 of 17 December 2020 ☒ EN 62087-1: 2016 ☒ EN 62087-2: 2016 ☒ EN 62087-3: 2016 ☒ EN 50564:2011
Testing laboratory.....	EST Technology Co., Ltd.
Address.....	Chilingxiang, Qishantou, Santun, Houjie, Dongguan, Guangdong, China
Laboratory Accreditation...	CNAS

Factory:	1) Huizhou KTC Technology Co., Ltd. 2) Dynabook Technology (Hangzhou) Inc. 3) Shenzhen KTC Commercial Display Technology Co.,Ltd
Address:	1) NO.38 Guangtai Road, Huinan HI-TECH Industrial Park, Huizhou City, Guangdong Province, P.R. China 2) 2/F,Building2,NO.3, East Gate,Comprehensive bonded Zone, Hangzhou Economic and Technical Development Zone,Zhejiang,China 3) The B district of the first floor,third floor and fourth floor, 1# Building,NO.4023, Wuhe Street, Bantian, longgang District, Shenzhen City, Guangdong Province, China

Standard and environmental conditions

Test Laboratory Address.....: EST Technology Co., Ltd.
Chilingxiang, Qishantou, Santun, Houjie, Dongguan, Guangdong, China

Standards applied.....: (EU) 2019/2021, (EU) 2021/341

Voltage/ frequency of power supply.....: 230Vac/50Hz

Fluctuation of electricity supply voltage during test.....: $\pm 0.5V$

Ambient temp(°C): 23.8

%VTHD of electricity supply....: 1.267%

Power Measuring device.....: Yokogawa WT310 Power Meter

Input signal.....: (EU) 2021/341ANNEX V test signal

Set-up and circuits used for electrical testing.....:

Measurement Conditions

Model.....: E988

Test Model.....: E988

Model difference.....: N/A

Operating condition.....: Off-mode

Method used.....: Sampling Method

Comments.....: The product was measured in off- mode. The product was connected to the main power source and not providing any function.

Operating condition.....: Stand-by mode

Method used.....: Sampling Method

Comments.....: The product was measured in “standby” mode. The product was connected to the main power source and without information or status display.

Operating condition.....: Network standby mode

Method used.....: Sampling Method

Comments.....: The product was measured in “standby” mode. The product was connected to the main power source and without information or status display.

Operating condition.....: On-mode

Method used.....: Accumulated energy approach using the (EU) 2021/341ANNEX V test signal.

Comments.....: The product was measured in Standard condition of the electronic display as delivered by the manufacturer. The readings were integrated over ten minutes test period for further accuracy.

Adjustment of controls: Mute

General Product Information

Product type:	☐ Television ☐ Monitor ☒ Digital signage display ☐ Broadcast displays ☐ Professional display ☐ Security display ☐ Digital interactive whiteboards ☐ Digital photo frame ☐ Status display ☐ Control panel
Manufacturer/Model of Screen: Shenzhen KTC Commercial Display Technology Co., LTD / K980WD97	
Viewable screen(Horizontal)(dm):	21.5885
Viewable screen(Vertical)(dm):	12.1435
Viewable screen area(square dm²):	262.16
Viewable diagonal screen size(inch):	98
Display resolution	3840*2160
Audio/Video Ports:	☒ HDMI ☐ CI ☒ VGA ☒ AV IN ☐ RF ☒ AUDIO IN ☒ Other: LAN, AUDIO OUT, RS-232C, POWER SUPPLY OUT, SPDIF OUT, USB
Is there ABC function?	☒ With ☐ Without
Is there force menu?	☐ With ☒ Without
Is EPS provided?	☐ Yes ☒ No
If yes, does Erp meets (EU) 2019/1782:	
	☐ Yes ☒ No
Manufacturer of EPS:	N/A
Type of EPS:	Model from report: N/A
Is network electronic display?	☒ Yes ☐ No
Is electronic display with HiNA functionality?:	☐ Yes ☒ No
Network port:	☒ Wired ☐ Wireless

Possible test case verdicts:

- test case does not apply to the test object.....: N/A (Not Apply.)
- test object does meet the requirement.....: P(ass)
- test object does not meet the requirement.....: F(ail)

Copy of marking plate(Representative):

The artwork below may be only a draft.

This is a representative label

Possible test case verdicts:

- test case does not apply to the test object.....: N/A (Not Apply.)
- test object does meet the requirement.....: P(ass)
- test object does not meet the requirement.....: F(ail)

Possible suffixes to the verdicts:

- suffix for detailed information for the : C(omment)
- suffix for important information for factory : M(anufacturing)

General remarks:

- 1, This test report shall not be reproduced except in full without the written approval of the testing laboratory.
- 2, The test results presented in this report relate only to the object tested.
- 3, "(See remark #)" refers to a remark appended to the report.
- 4, "(See appended table)" refers to a table appended to the report.
- 5, This report shall not be reproduced except in full without the written approval of the testing laboratory.
- 6, Customers will ship with energy efficiency labels that meet the 2019/2013 standards.

Clause	ANNEX II A:ENERGY EFFICIENCY REQUIREMENTS	Result -Remark	Verdict												
ENERGY EFFICIENCY INDEX LIMITS FOR ON-MODE															
A.1	The energy efficiency index (EEI) limits EEI limits for on-mode <table border="1"> <thead> <tr> <th></th><th>EEI_{max} for electronic displays with resolution up to 2 138 400 pixels (HD)</th><th>EEI_{max} for electronic displays with resolution above 2 138 400 pixels (HD) and up to 8 294 400 pixels (UHD-4k)</th><th>EEI_{max} for electronic displays with resolution above 8 294 400 pixels (UHD-4k) and for MicroLED displays</th></tr> </thead> <tbody> <tr> <td>1 March 2021</td><td>0,90</td><td>1,10</td><td>n.a.</td></tr> <tr> <td>1 March 2023</td><td>0,75</td><td>0,90</td><td>0,90</td></tr> </tbody> </table>			EEI_{max} for electronic displays with resolution up to 2 138 400 pixels (HD)	EEI_{max} for electronic displays with resolution above 2 138 400 pixels (HD) and up to 8 294 400 pixels (UHD-4k)	EEI_{max} for electronic displays with resolution above 8 294 400 pixels (UHD-4k) and for MicroLED displays	1 March 2021	0,90	1,10	n.a.	1 March 2023	0,75	0,90	0,90	--
	EEI_{max} for electronic displays with resolution up to 2 138 400 pixels (HD)	EEI_{max} for electronic displays with resolution above 2 138 400 pixels (HD) and up to 8 294 400 pixels (UHD-4k)	EEI_{max} for electronic displays with resolution above 8 294 400 pixels (UHD-4k) and for MicroLED displays												
1 March 2021	0,90	1,10	n.a.												
1 March 2023	0,75	0,90	0,90												
The energy efficiency index (EEI) $EEI = \frac{(P_{measured} + 1)}{(3 \times [90 \times \tanh(0,02 + 0,004 \times (A - 11)) + 4] + 3) + corr}$		EEI:0.648 Declared value EEI:0.725	P												
$P_{measured}$ is the measured power in Watts in on mode in the normal configuration, in standard dynamic range (SDR)		$P_{measured}$: 143.75W Declared value $P_{measured}$: 161.0W	P												
$P_{measured}$ is the measured power in Watts in on mode in the normal configuration, in standard dynamic range (HDR)		$P_{measured}$: 144.64W Declared value $P_{measured}$: 160.0W	P												
corr is a correction factor of 10 for OLED electronic displays that do not apply the ABC allowance in point B (1). This shall apply until 28 February 2023. corr shall be zero in all other cases.		Corr:0	P												

Clause	ANNEX II B:ALLOWANCES AND ADJUSTMENTS FOR THE PURPOSE OF THE EEI CALCULATION AND FUNCTIONAL REQUIREMENTS	Result -Remark	Verdict
B.1	Electronic displays with automatic brightness control (ABC) shall qualify for a 10 % reduction in $P_{measured}$ if they meet all of the following requirements: a. ABC is enabled in the normal configuration of the electronic display and persists in any other standard dynamic range configuration available to the end user; b. the value of $P_{measured}$, in the normal configuration, is measured, with ABC disabled or if ABC cannot be disabled, in an ambient light condition of 100 lux measured at the ABC sensor; c. if applicable, the value of $P_{measured}$ with ABC disabled shall be equal to or greater than the on mode power measured		N/A

	with ABC enabled in an ambient light condition of 100 lux measured at the ABC sensor; d. with ABC enabled, the measured value of the on mode power must decrease by 20 % or more when the ambient light condition, measured at the ABC sensor, is reduced from 100 lux to 12 lux; e. the ABC control of the display screen luminance meets all of the following characteristics when the ambient light condition measured at the ABC sensor changes: - - the measured screen luminance at 60 lux is between 65 % and 95 % of the screen luminance measured at 100 lux; - - the measured screen luminance at 35 lux is between 50 % and 80 % of the screen luminance measured at 100 lux; - - the measured screen luminance at 12 lux is between 35 % and 70 % of the screen luminance measured at 100 lux.		
B.2	Forced menu and set up menus: Electronic displays may be placed on the market with a forced menu on initial activation proposing alternative settings. Where a forced menu is provided, the normal configuration shall be set as default choice, otherwise the normal configuration shall be the out-of-the-box setting.		N/A
	If the user selects a configuration other than the normal configuration and this configuration results in a higher power demand than the normal configuration, a warning message about the likely increase in energy use shall appear and confirmation of the action shall be explicitly requested.		N/A
	If the user selects a setting other than those that are part of the normal configuration and this setting results in a higher energy consumption than the normal configuration, a warning message about the likely increase in energy consumption shall appear and confirmation of the action explicitly requested.		N/A
	A change by the user in a single parameter in any setting shall not trigger any change in any other energy-relevant parameter, unless unavoidable. In such a case a warning message shall appear about the change of other parameters and the confirmation of the change shall be explicitly requested.		N/A
B.3	Peak white luminance ratio: In the normal configuration, the peak white luminance of the electronic display in a 100 lux ambient light viewing environment shall not be less than 220 cd/m² or, if the	276.2 cd/m ²	P

	electronic display is primarily intended for close viewing by a single user, not less than 150 cd/m ² .		
	If the electronic display's peak white luminance in the normal configuration is set to lower values, it shall not be less than 65 % of the peak white luminance of the display, in a 100 lux ambient light viewing environment in the brightest on mode configuration.	Default luminance more than 220 cd/m ²	N/A

Clause	ANNEX II C:OFF MODE, STANDBY AND NETWORKED STANDBY MODE REQUIREMENTS	Result -Remark	Verdict																																
C.1	Power demand limits other than on-mode <i>Table 2</i> power demand limits other than on-mode, in Watts <table border="1"> <thead> <tr> <th></th><th>Off mode</th><th>Standby mode</th><th>Networked standby mode</th></tr> </thead> <tbody> <tr> <td>Maximum limits</td><td>0,30</td><td>0,50</td><td>2,00</td></tr> <tr> <td>Allowances for additional functions when present and enabled</td><td></td><td></td><td></td></tr> <tr> <td> Status display</td><td>0,0</td><td>0,20</td><td>0,20</td></tr> <tr> <td> Deactivation using room presence detection</td><td>0,0</td><td>0,50</td><td>0,50</td></tr> <tr> <td> Touch functionality, if usable for activation</td><td>0,0</td><td>1,00</td><td>1,00</td></tr> <tr> <td> HiNA function</td><td>0,0</td><td>0,0</td><td>4,00</td></tr> <tr> <td>Total maximum power demand with all additional functions when present and enabled</td><td>0,30</td><td>2,20</td><td>7,70</td></tr> </tbody> </table>		Off mode	Standby mode	Networked standby mode	Maximum limits	0,30	0,50	2,00	Allowances for additional functions when present and enabled				Status display	0,0	0,20	0,20	Deactivation using room presence detection	0,0	0,50	0,50	Touch functionality, if usable for activation	0,0	1,00	1,00	HiNA function	0,0	0,0	4,00	Total maximum power demand with all additional functions when present and enabled	0,30	2,20	7,70		--
	Off mode	Standby mode	Networked standby mode																																
Maximum limits	0,30	0,50	2,00																																
Allowances for additional functions when present and enabled																																			
Status display	0,0	0,20	0,20																																
Deactivation using room presence detection	0,0	0,50	0,50																																
Touch functionality, if usable for activation	0,0	1,00	1,00																																
HiNA function	0,0	0,0	4,00																																
Total maximum power demand with all additional functions when present and enabled	0,30	2,20	7,70																																
	Power consumption of a electronic display in 'off mode Limited:0.3W	0.001W	P																																
	Power consumption of a electronic display in 'standby mode(s) Limited:see table 2	0.20W	P																																
	Power consumption of a electronic display in 'Networked standby mode(s) Limited:see table 2	1.32W	P																																
C.2	Availability of off, standby and networked standby modes Electronic displays shall provide off mode or standby mode or a networked standby mode or other modes which do not exceed the applicable power demand requirements for standby mode.	Standby mode Network standby mode	P																																
	The configuration menu, instruction manuals and other documentation, if any, shall refer to off mode, standby mode or networked standby mode using those terms.		P																																
	Automatic switch to off mode and/or standby mode and/or another mode which does not exceed the applicable power demand requirements for standby mode shall be set as default, including for networked displays where the network interface is enabled when in on mode.		P																																

	Networked standby mode shall be disabled in 'normal configuration' of a networked television. The end user shall be prompted to confirm the activation of networked standby, if it is needed for a chosen remotely activated function, and must be able to disable it.		P
	Networked electronic displays shall comply with the requirements for standby mode when networked standby mode is disabled.		P
C.3	Automatic standby in televisions: a)Televisions shall provide a power management function, enabled as delivered by the manufacturer that, within 4 hours following the last user interaction, shall switch the television from on mode into standby mode or networked standby mode or another mode which does not exceed the applicable power demand requirements respectively for standby or networked standby mode. Before such automatic switch, televisions shall show, for at least 20 seconds, an alert message warning the user of the impending switch, with possibility of delaying or temporarily cancelling it.	Digital signage display	N/A
	(b) If the television provides a function allowing the user to shorten, extend or disable the 4-hour period for automatic mode transitions detailed in (a), a warning message shall appear about a potential increase in energy use and a confirmation of the new setting must be requested when an extension beyond the 4-hour period or disabling is selected.		N/A
	(c) If the television is equipped with a room presence sensor, the automatic transition from on mode into any mode as detailed in (a) applies if no presence is detected for no more than 1 hour.		N/A
	(d) Televisions with various selectable input sources shall prioritise the power management protocols of the signal source selected and displayed over those default power management mechanisms described in the paragraphs (a) to (c) above.		N/A
C.4	Automatic standby in displays other than televisions Electronic displays other than televisions, with various selectable input sources shall switch, as configured in the normal configuration, into standby mode, networked standby mode or another mode which does not exceed the applicable power demand requirements respectively for standby or networked standby mode when no input is detected by any input source for over 10 seconds and, for digital interactive whiteboards and for broadcast displays, for over 60 minutes.		P

	Before triggering such a switch, a warning message shall be displayed and the switch completed within 10 minutes.		P
--	---	--	---

Clause	ANNEX II D:MATERIAL EFFICIENCY REQUIREMENTS	Result -Remark	Verdict
D.1	Design for dismantling, recycling and recovery:		P
D.2	Plastic components heavier than 50 g: (a) Shall be marked by specifying the type of polymer with the appropriate standard symbols or abbreviated terms set between the punctuation marks '>' and '<' as specified in available standards. The marking shall be legible.		P
D.3	Electronic displays with a screen panel in which concentration values of Cadmium (Cd) by weight in homogeneous materials exceed 0,01 % as defined in Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment, shall be labelled with the 'Cadmium inside' logo. The logo shall be clearly visible durable, legible and indelible. The logo shall be in the form of the following graphic: 		P
D.4	Halogenated flame retardants		P
D.5	Design for repair and reuse		P

Clause	ANNEX II E:INFORMATION AVAILABILITY REQUIREMENTS	Result -Remark	Verdict
E.1	Availability of software and firmware updates		P

(EU) 2019/2013 Test and verification results:

Method for calculating the Energy Efficiency Index Annex II:

Clause	Description	Result - Remark								
1	A:The viewing surface area in dm ²	262.16
