

Sharp MX-7500N

with EFI Fiery MX-PE10 Controller

**Outstanding 71- to 80-ppm
A3 Colour MFP**

The Sharp MX-7500N won BLI's Pick for Outstanding 71- to 80-ppm A3 Colour MFP for the Summer 2015 season for its...

- Industry-first integration of EFI's Fiery Command WorkStation into the touch-screen display, which offers convenience, and reduces the costs and space requirements associated with having to purchase an additional monitor, keyboard, mouse and stand.
- Full-bleed booklet printing technology allows for the creation of high-end booklets on A3 paper without the need for a three-edge trimmer or more expensive A3+ paper.
- Excellent feature set, including the highest memory, hard drive, and paper capacities among its peers.
- High-quality printed output.

"The Sharp MX-7500N separates itself from the pack with its exemplary reliability over the course of its 350,000-impression test, as well as cost-saving and convenience-enhancing innovations," said George Mikolay, BLI's senior product editor for A3 copiers/MFPs. "Plus, its high-quality printed output and pro-active measures for prevention of paper overloading and misfeeds ensures users of consistent and high-quality performance day in and day out in the high-end office space."

About **BLI Pick Awards**

Twice a year with its Pick awards, BLI gives special recognition in each category to those products that provided the most outstanding performances in BLI's exhaustive lab tests.

BLI's awards stand alone in that they are based on a rigorous battery of lab tests that takes approximately two months to complete. The evaluation includes an extensive durability test, during a portion of which each unit is run at the manufacturer's maximum duty cycle. BLI's durability test is unique among office product evaluations and uniquely qualifies BLI to assess reliability, a critical factor for buyers and IT directors.

Other performance attributes evaluated include ease of use, media handling, productivity and value, among others. Each product that successfully passes BLI's lab test earns BLI's Recommended or Highly Recommended seal and a BLI Certificate of Reliability and the best performers qualify as Pick contenders. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
