

Sharp is a pioneer in photovoltaics /This is Why Sharp solar modules have set standards for over 50 years.

Innovations from a photovoltaic pioneer

As a solar specialist with more than 50 years of experience in photovoltaics (PV), Sharp makes significant contributions to groundbreaking progress in solar technology. Sharp photovoltaic modules in the ND series are designed for applications with high power requirements. All Sharp ND series modules offer system integration which is optimal both technically and economically, and are suitable for installations in on- and off-grid PV systems.

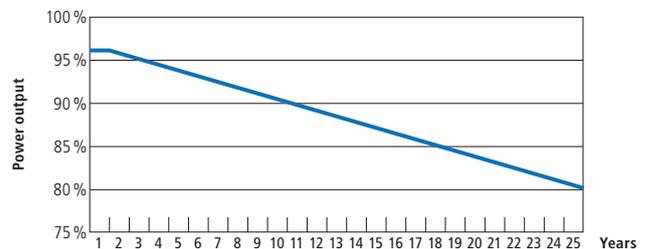

Product features

- High-performance photovoltaic modules made of polycrystalline (156.5 mm)² silicon solar cells with module efficiencies of up to 15.2%.
- 3 busbar technology for enhancing the power output.
- Anti-reflex coating to increase light absorption.
- Production controlled positive power tolerance from 0 to +5%. Only modules will be delivered that have the specified power or more for high energy yield.
- Improved temperature coefficient to reduce power losses at higher temperatures.
- High power performance even at lower irradiances.

Quality from Sharp

Continual checks guarantee a consistently high level of quality. Every module undergoes visual, mechanical, and electrical inspection. This is recognisable by means of the original Sharp label, the serial number, and the Sharp guarantee:

- 10-year product guarantee
- 25-year linear performance guarantee
 - Minimum 96% of the specified minimum power output during the first year
 - Maximum 0.667% annual reduction of the power output for the following 24 years

AWARDS FOR BRAND AWARENESS, BRAND EVALUATION, INSTALLERS' CHOICE AND DISTRIBUTION.
