Cinema Silencer Housing

Silencer Housing for NC900C
installation directly into cinema
auditorium.

NEC Silencer Housing enables installation of silent the NC900C cinema projector directly into the cinema auditorium without a projection booth. Furthermore, no airduct is required for this solution. This cost saving installation allows the cinema exhibitor to increase the number of seats in the auditorium, in place of a previously required projection booth. A big step in the future cinema experience.

Delivering Genuine Benefits

- Easy installation into the cinema auditorium or Post Production screening room. Only one single phase power plug is required, no airduct necessary
- Quick removable side panels for easy projector maintenance or lamp exchange
- Noise level of <38dB for a silent cinema experience
- Additional space available in the box for the attachment of 3D systems or routers

NC900C installed
