

SLOT-IN PC WITH INTEL® ATOM 2 X 1.6 GHZ PROCESSOR

STv2 ATOM 2x1.6 2/32/WS7E ORDER CODE: 100013071

NEC Slot-In PC STv2

The Slot-In PC is a complete PC solution, compatible with NEC Public Displays with STv2 or DualSlot and also NEC PX Series and PH Series installation projectors.

The new Intel Atom 2 x 1.6GHz Slot-in PC not only boasts an improved performance ideal for Full HD crisp playback, it also features a wide range of connectivity options, including 2 x USB 2.0, SD Card, RJ45 and Mini DisplayPort out, so it can be easily integrated into your network architecture.

NEC OPS CONCEPT: A SIMPLE PLUG IN TO THE FUTURE

The NEC Option Board concept means that your display has a versatile upgrade path for the future. Your STv2 Option Board can be exchanged between any NEC display or high end NEC projector fitted with a Dual or STv2 option slot, meaning that a single OPS device can be used in different products in different locations on a simple plug in and play basis.

With no cables required due to internal connection for power, video, audio and control, the option board fits neatly within the display or projector profile for a more elegant installation.

SINGLE SERVICE POINT

An NEC Display Solution that incorporates an Option Board uniquely gives the customer one service contact and matching warranties for the display and the board and in the case servicing is required, a slot product can easily be removed and serviced separately with the display in tact.

FUTURE PROOFING YOUR DISPLAY

Option Slots give your display an either way 'upgrade path', enjoy improved cost of ownership as you can upgrade your OPS device or upgrade your display individually during the ordinary lifecycle. Your OPS devices are exchangeable between compatible products either directly or in certain cases using a cradle.

Delivering Genuine Benefits

ATOM 2 x 1.6 GHz Processor with Integrated Intel® Graphics

Wide Connectivity: 2 x USB 2.0, SD Card Slot, Gigabit Ethernet and Mini DisplayPort out

Flexible User Configuration with a Variety of Solid State Drives, RAM, Operating Systems and WiFi connectivity (W-LAN ready)

Full 1080p Playback ensures Reliable Crisp and Clear Content

Full Networking Capabilities with Integrated Ethernet Connection

Super Low Power Consumption

All Connectors are inside the Displays including Power, Video & Audio Signals and RS232. No External Cables Required.

Can run while the Display is switched off for e.g. Nightly Updates

Compatible with NEC / Intel OPS Standard for Option Slot Products
