

Synappx™ Cloud Print

Optimum productivity, security and sustainability in hybrid work environments

Printing that flexes with your day-to-day.

Easy access to the right information is key to getting the most from your workforce.

As an increasing number of businesses adopt a hybrid workplace model, blending remote work with geographically dispersed devices, they face a complex challenge: how to print documents efficiently and securely while minimising waste.

Synappx Cloud Print provides small and medium-sized enterprises with easy-to-use, flexible, and cost-effective print management. Delivering secure printing and print accounting 'as a service', our cloud-based solution requires zero on-premise infrastructure – meaning no matter where you are, you have access to secure and reliable printing services.

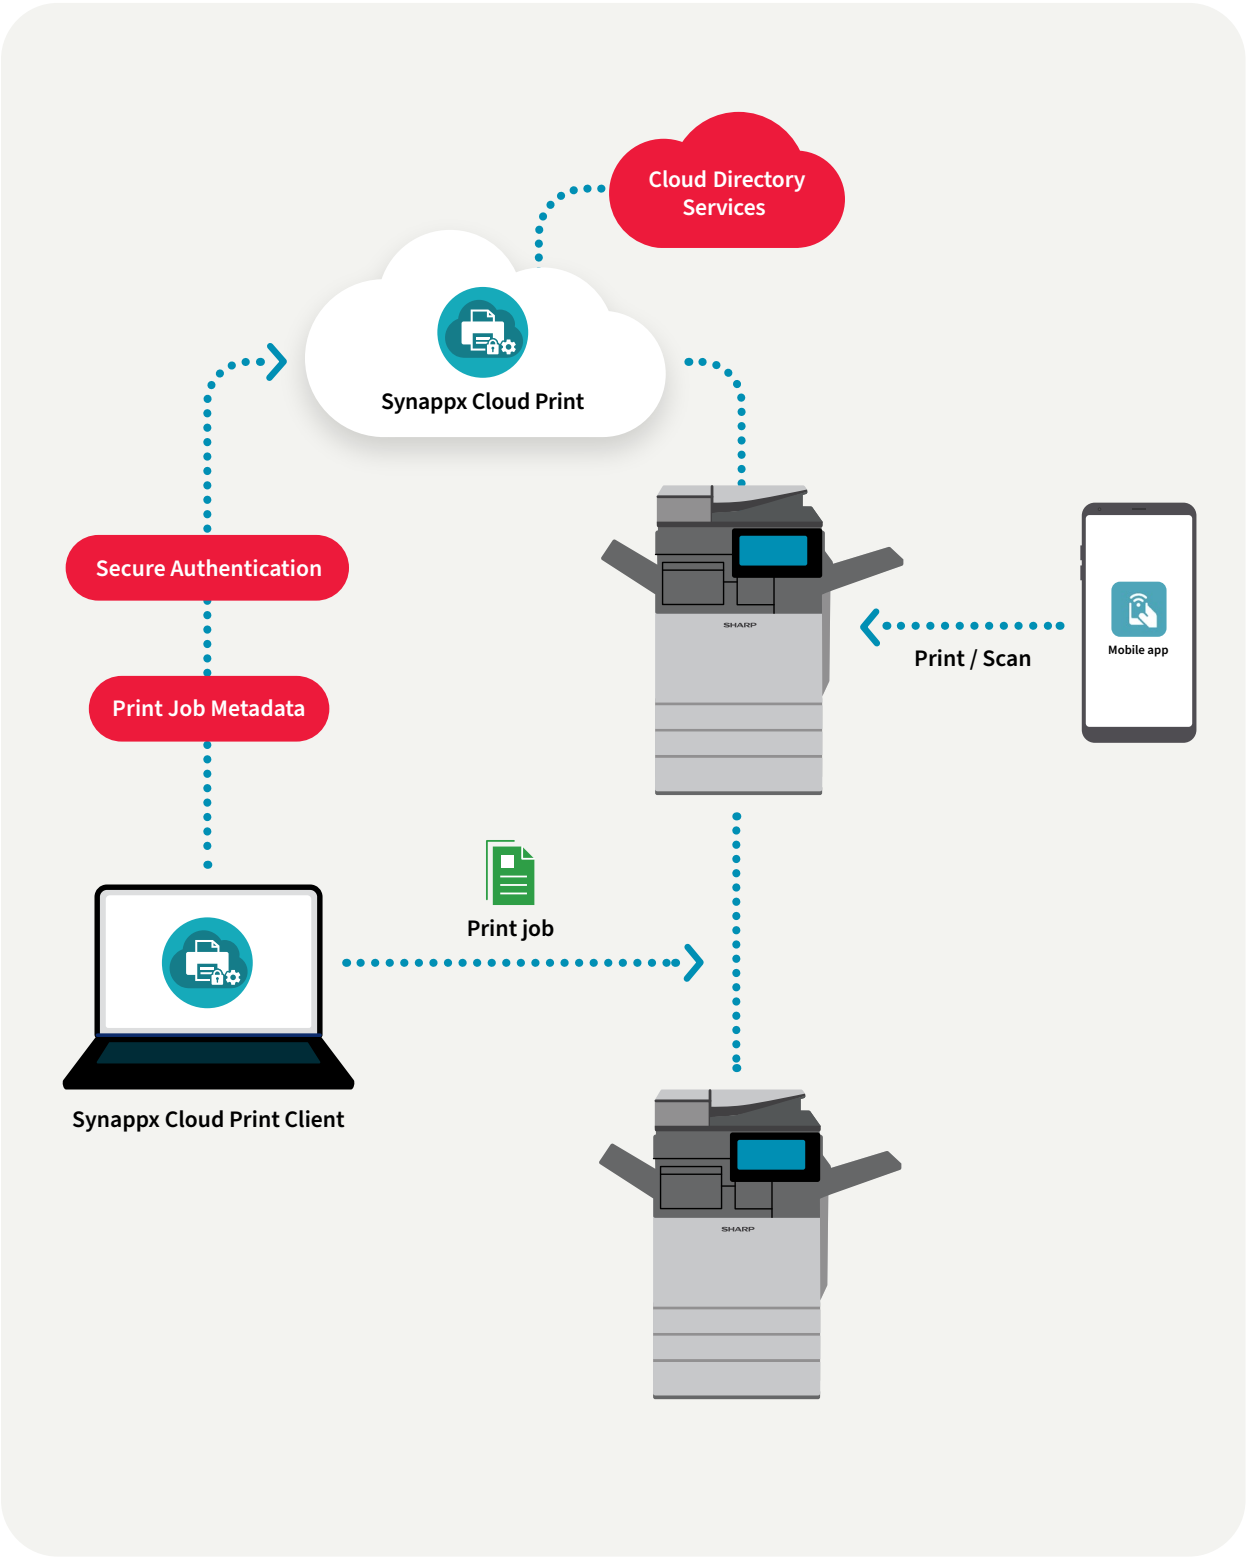

Leveraging the smart functionality of the future-ready Synappx Services Platform (SSP) and Sharp's future workplace Multi-Function Printers (MFPs) to remove complex technology hurdles, Synappx Cloud Print is the latest addition to our comprehensive lineup of Document & Print Management Software solutions. It works seamlessly with both Sharp MFPs and compatible third-party devices, and is also designed to complement Sharp's portfolio of Print Management solutions.

Having the flexibility to work both productively and securely across multiple locations is critical to driving productivity across the board.

Synappx Cloud Print's print release technology for Sharp devices enables documents to be printed on the most convenient device, facilitating more secure and sustainable printing.

Synappx Cloud Print in action.

Streamline your everyday.

Streamlining collaboration is a key priority for businesses. And at the heart of greater collaboration is easier, more secure and efficient information access and sharing.

Synappx Cloud Print is a cloud print management service that is optimised to work with your Sharp (MFPs) and supports other compatible third-party printers.

Simple to install and easy to use and maintain, you and your team can simply walk up to any available device, enter a PIN number or swipe your ID card, and print documents when it is most convenient – helping your team be as secure and productive as possible.

The system administrator has complete control over user and group management, for example specific devices can be restricted to different departments for more efficient use. And using the status dashboard and reports, you can comprehensively monitor and report printing activity across your entire device fleet.

What's more, Synappx Cloud Print features a 'pay as you go' subscription with no additional on-premises hardware required, meaning you can get up and running in no time. This simple set-up also helps you avoid costly up-front investment, alongside the flexibility to scale as your needs evolve – and ultimately drive greater business efficiency.

Synappx Cloud Print also includes a mobile app that connects you to your cloud storage services including Microsoft Teams, OneDrive and DropBox via a simple intuitive interface. Plus, with the mobile app, documents can easily be printed or scanned to connected services.

Secure by design.

Tackling security one step at a time.

For hybrid workforces, security is paramount – particularly when ensuring easy sharing of confidential information between team members.

Document security

Synappx Cloud Print keeps sensitive information safe. The secure print release functionality for Sharp devices stops confidential documents from being left unattended; only the user that sent the documents to print can retrieve them.

Print security

An additional level of security is provided by ensuring any print jobs do not leave your local network, where they are protected behind a firewall and the data is encrypted, so they remain inaccessible while they are in transit or waiting to be printed.

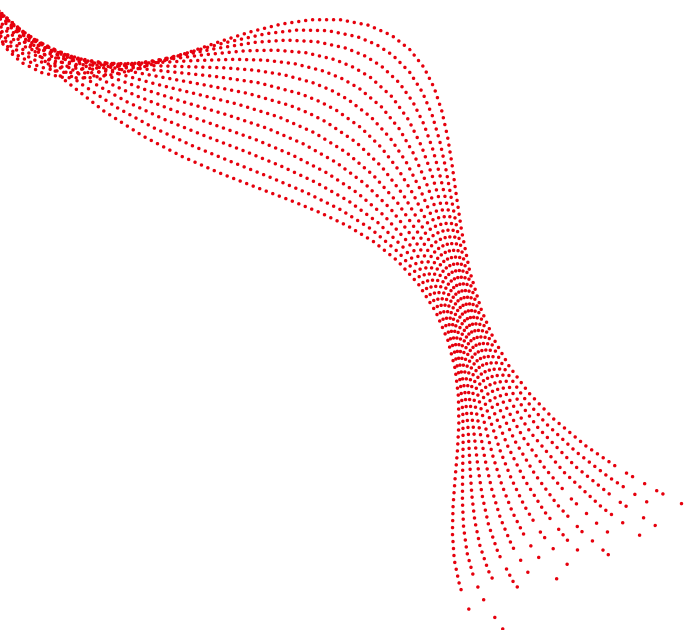

System integration

Synappx Cloud Print is designed to integrate with your existing cloud directory services provider*, making user identity management secure and convenient. In addition, it includes a two-factor authentication option that requires two forms of authentication, for example a card swipe and a PIN.

Guest printing won't compromise on safety either. Synappx Cloud Print enables visitors to print via a temporary PIN to preserve print monitoring and security protocols.

Finally, it provides a full print audit trail and reporting, which helps ensure compliance with relevant data management regulations.

* Microsoft 365 and Google Workspaces

Going greener for less.

Avoiding unnecessary waste and expenditure can go a long way to towards businesses achieving their sustainability goals.

Synappx Cloud Print provides more proactive control of what is printed, using visual prompts and reports to encourage users to print sustainably. By encouraging team members to print and release only the documents they need, waste – including paper, toner, and energy – can be significantly reduced.

Plus, businesses can generate individual impact reports that show how sustainably each user is printing, allowing for more effective and connected print accounting while helping businesses track of and enhance their green credentials.

Specifications.

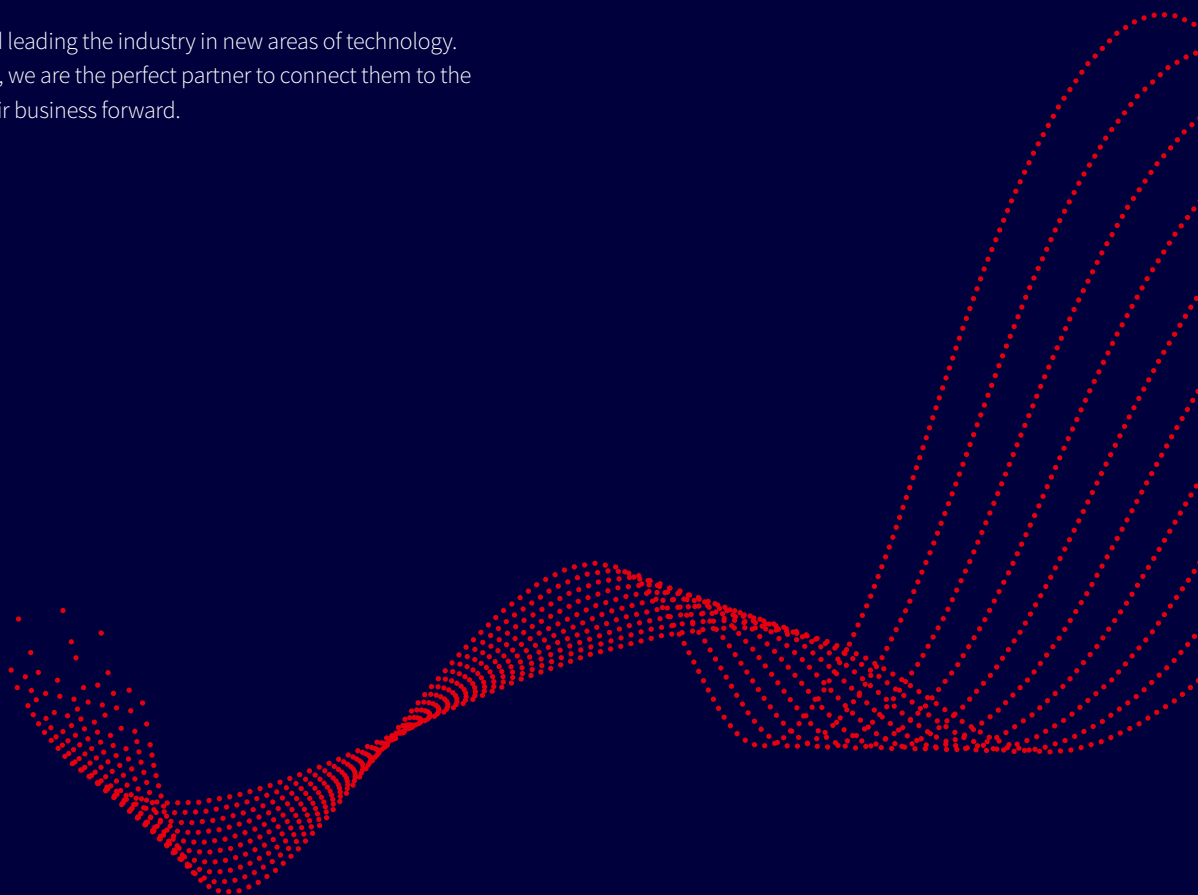

Hardware Requirements (SCP Client)	
Processor	1 gigahertz (GHz) or faster with two or more cores – 64-bit
Memory	4 gigabytes (GB) or greater
Storage	64 GB or greater available disk space Internet connectivity Microsoft Windows 10 or 11
Browser Requirements	Microsoft Edge v117 (or above), Firefox v118 (or above), Chrome v117 (or above)
Sharp MFP Requirements	
A Sharp Group 1 MFP running OSA version 5.5 or above with EAM (AMX3 or BP-AM11) and (AMX2 or BP-AM10) keys installed	
A Sharp Group 2 MFP with firmware version 230.207 and above	
Internet connectivity	
Third-party Printers	
SNMP v1.0 or later and IPP Printing support	
Mobile App	
iOS 14 (or above), Android 11 (or above)	
Sharp device support only	

Welcome to Sharp

Sharp Europe helps organisations thrive in a rapidly changing working world. Through connecting people and technology, we deliver trusted, tailored solutions for the workplace and public spaces that increase efficiency and enhance performance, while freeing up our customers to focus on what they do best.

Sharp Europe has a portfolio ranging from printers and advanced display technologies, through to IT Services and collaboration platforms like our Synappx Services.

Sharp Europe is investing and leading the industry in new areas of technology. As our customers' needs shift, we are the perfect partner to connect them to the technology that will drive their business forward.
