Note for installing Authoring software

1. Installation of Visual C++ Runtime Module (For Windows XP, Vista)

This software requires the Visual C++2005 SP1 Runtime Module to be preinstalled on the CenterSystem' s PC before it is installed.

Download and install the "Microsoft Visual C++ 2005 SP1 Redistributable Package (x86)" from the Download Center on the Microsoft Website.

<http://www.microsoft.com/downloads/details.aspx?FamilyID=200b2fd9-ae1a-4a14-984d-389c36f85647&displaylang=ja>

2. Installation of Microsoft .NET Framework 2.0 or 3.5 (For Windows XP)

In case you use Windows XP, you need to install Microsoft .NET Framework 2.0 or 3.5 on the CenterSystem' s PC before installation. Confirm the "Reference" procedures below and install as necessary. Not necessary for Windows Vista.

Step1. Confirmation of installation of Microsoft .NET Framework 2.0 or 3.5 (For Windows XP)

Open the "Start Menu" -> "Control Panel" of Windows XP. Select "Add/Delete Program", and confirm the list in "Currently Installed Programs".

If it is not installed, go to Step 2.

*Note 1) Even when .NET Framework 1.0/1.1/3.0 are already installed, it is still necessary to install .NET Framework 2.0 or 3.5.

*Note 2) Installation is not necessary if any of the following is already installed.

.NET Framework 2.0 / .NET Framework 2.0 Service pack1 / .NET Framework 2 Service pack2 /

.NET Framework 3.5 / .NET Framework 3.5 Service pack1

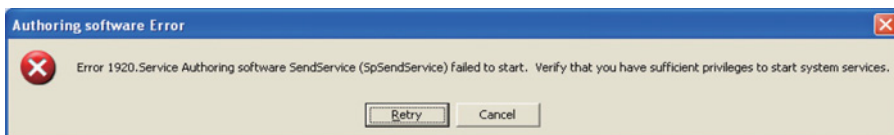

Step2. Installation of Microsoft .NET Framework 2.0 or 3.5 (For Windows XP)

- 1) Set the computer' s internet connection.
- 2) Select "Start" -> "All Programs" -> "Windows Update" in Windows.
- 3) Select "Customize" and wait until the confirmation of updated program has finished.
- 4) Select "Add Selection (Software)" on the left side of the display.
- 5) Select one of the following from the updated program by ticking the box. *Note3)
 - .NET Framework 2.0 / .NET Framework 2.0 Service pack1 / .NET Framework 2 Service pack2 /
 - .NET Framework 3.5 / .NET Framework 3.5 Service pack1
- 6) Select and install "Install Updated Program".

*Note3) In case no selection is shown, it may be possible that it is already installed.

Confirm with Step 1 again.

*Note4) When Authoring software is installed before .NET Framework 2.0 or 3.5 is installed, the following errors will be displayed. In that case, uninstall authoring software and follow Steps 1 and 2.

3. Start-up in Windows Vista

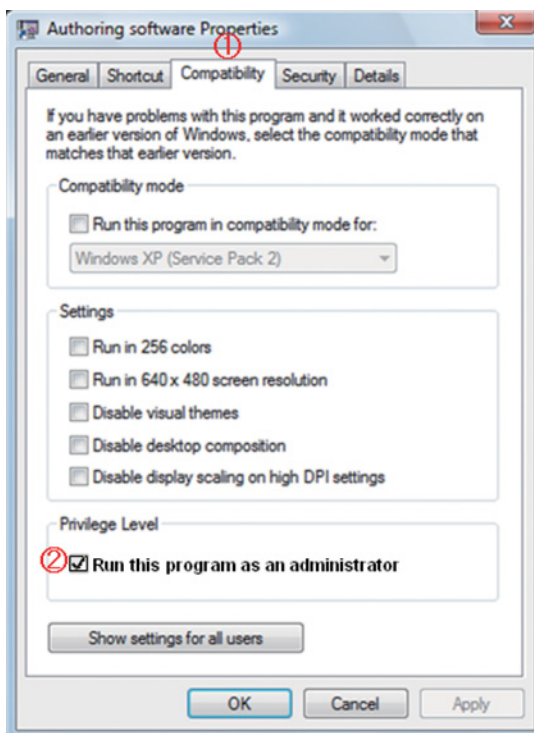

In case you use Windows Vista, you may get an error message which says “SpSv stopped operating”, and the PC may not start. In that case, follow the procedures below to execute the Authoring software.

Step 1. Create a shortcut menu for the Authoring software to be executed.

Step 2. Right click the shortcut menu and open the properties.

Step 3. Click on the compatibility tab ① to select “Execute this program as an administrator” ②.

Step 4. For subsequent start-ups click the shortcut menu.
