The UP-X300 is a flexible all-in-one solution combining reliable hardware and brilliant display with powerful built-in software. The easy to install and use UP-X300 terminal was developed to reflect the needs of the different hospitality businesses. Many new features, such as a "visible stock count", "repeat round" or "different promotion activities", have been incorporated while sophisticated table management, bill separation, time-sensitive promotions like "Happy Hour" and cooking to customer-specific tastes now come as standard functions. Additionally the Customer management facility allows to set up a kind of customer relation management. The integrated Back Office software offers a detailed reporting which allows to compare product groups or to analyse promotion activities. System expansion requirements are supported by USB and serial interfaces as well by a Ethernet LAN network.
