

Document Capture Software

OPTIMICAPTURE

OptimiCapture helps organisations work smarter by automating manual document tasks and streamlining everyday workflows.

- With AI-powered processing, it ensures documents are accurately routed, reducing errors and saving valuable time.
- Share documents with your team in the cloud, with the same experience whether you're in the office or remote.
- Convert physical documents into high-quality digital files using smart scanning and OCR.
- AI identifies and pulls out essential information, like names, dates, invoice numbers, or contract terms, without manual input.
- Connect with cloud storage, ERP, CRM, or DMS systems to keep your digital ecosystem in sync.
- Can be seamlessly deployed across any environment, all centrally managed through a single, intuitive administration portal.
- Tailored document workflows with defined processing steps and access permissions.
- Simple scanning for every employee, with document conversion and advanced features for saving to personal or company storage.
- Hybrid work-ready with flexible capture options, including a Mobile Capture App.
- Capture paper or digital documents anytime and anywhere through MFP, mobile or web.
- Scan a batch of documents and split them by barcode, blank page or specific value.
- Detailed insights into how document workflows are utilised across departments and throughout the workday.
