Do you face any of the following challenges?

intuitive

You have printing related cost saving and environmental targets
to hit but no effective way of quickly and easily identifying the key issues, other than spending large amounts of manual effort.

You have access to a wealth of print management information,
but critical Information is only available in static reports which is difficult to analyse and there is no easy ways to ask questions

You want to quickly identify your high-volume users and analyse their usage

You want to identify some of the key trends
eg what applications people are printing from, but it is difficult to understand

You wish to rationalise your print estate,
but it is difficult to analyse the use patterns for different users and departments

You need to distribute reports to key departments on their usage / costs, but it is hard to achieve

Intuitive dashboards for print management

Harness the data stored in your print management software

Present a visual & dynamic data summary for all key stakeholders

Manage and control print usage and spend

Work smarter, do more with less and keep costs controlled

intuitive

Reduce print costs to free up your IT budget for innovation projects

Intuitive Dashboards for Print Management are a range of pre-integrated BI solutions which are delivered with a complete set of standard configurations. This allows the solutions to be delivered and enabled within a single day at a significantly reduced cost and with superior analysis capability when compared with comparable Business Intelligence solutions.

Dashboards that show:

Print Summary – print and copy volumes, drill down to see applications, simplex/duplex, printing by application, volume trends over time.

Cost Summary – costs over time, by department, user, application, mono vs colour, print vs. copy.

User Analysis – Top 500 print users, analyse by individual user.

Device Analysis – device usage by device type over time, device activity and volume trends.

Scan Summary – scan volumes by device, department, identify top users.

Cost Savings – summary of cost savings achieved by enforced cancellation of print jobs.

Key Benefits

Cost Management

- See clearly where print demand is coming from (user, print groups, application, device and the relationships between them)
- View the latest available usage data for your multi-function devices, giving you shorter & more effective decision cycles
- Automate and personalise monthly reporting for different budget holders
- Identify opportunities to improve the efficiency of your print management infrastructure Monitor the effectiveness of your print management policies and rules

Environmental Impact

- The dashboards show CO2 produced as well as paper & electricity consumed by printing so can be used to communicate environmental impact to all print users

Quick and Personalised Analysis

- The dashboards offer flexibility to view data from the entire organisation or filtered to show data of interest (e.g. for one or more departments, for one or more print groups, for one or more groups of printers etc.) Submit these questions to the dashboard on demand for quicker and easier analysis than with static reports.
