SHARP

Be Original.

We have enhanced the power of our MFPs

We know our customers care about efficiency, so we are putting you in control

Control is the first step towards efficiency. And Sharp's Print Release Software (MX-SW100) is an easy way to take control. With fewer visits to the office MFP, less waste, greater accountability and better document security, this is office efficiency in action.

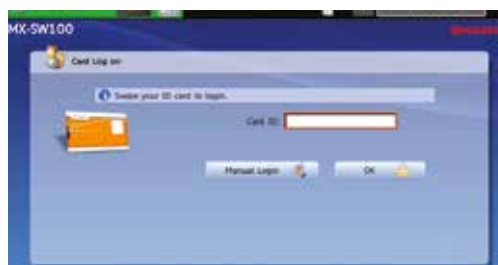

Simply print as normal, then do nothing. When it's convenient, walk up to the MFP* of your choice and log on. As soon as you're recognised, every feature becomes instantly available. You can print out (or delete) any and all of your documents, leave some for later, or use Document Filing to archive them.

Choose how many copies you want; decide on colour or black & white; single- or double-sided; what paper size and which finishing options. A handy on-screen preview feature illustrates the result, making everything easy and intuitive.

There's more to this than printing, though. Logging on also unlocks the copy and scan functions and gives you one-touch access to any Single Sign On-compatible Sharp OSA (Open Systems Architecture) applications that you've installed.

Select finishing options

Secure login via card

* MX-SW100 requires a Sharp OSA 3.5 or above-enabled MFP with the MX-AMX3 and/or MX-AMX2 modules installed.

Information is an important resource

Through the power of network authentication, we will help you take care of your business information

Powerful network authentication (implemented with swipecards or username / password combinations) makes it easy to keep your sensitive information secure.

For a start, the MFP won't respond to unauthorised users*. No one will accidentally pick up your documents, either, because you'll always be there when they're being printed, and other users won't be able to view your job list.

Our Print Release Software can create detailed reports of who printed what, and when. You'll learn which MFPs are being under- or overused, so you can put the right machine in the right place. And if an MFP is being shared between two or more workgroups you can use the reports - which can be viewed on-screen or exported to a spreadsheet - to apportion the costs.

Adding new users is easy, too, because their details can be copied across from your network server.

User Full Name	Refid	Total B/W	Total Color	Ledger	A2	Legal	Letter	A4	Other	Duplex one side	Duplex two sides	Department	Computer Name	User Name

* MX-AMX3 required.

Specifications

Hardware Requirements

Processor speed (GHz) (Min)	1.5
HDD (GB) (Min)	25
RAM (GB) (Min)	2

Software Requirements

Microsoft .NET framework 3.5 (or above)
SQL Database Software
IIS Services
Internet Explorer 7 (or above) or Firefox 4 (or above)

MFP Requirements

Sharp OSA 3.5 (or above) enabled MFP
MX-AMX3 and/or MX-AMX2
Can support up to 100 concurrent MFPs

Supported OS

32 or 64 bit	Windows Server® 2008 Standard Windows® 7 Professional Windows® 7 Enterprise Windows® 7 Ultimate
64 bit	Windows Server® 2008 R2 Windows Server® 2008 Enterprise Windows Server® 2008 DataCenter

Welcome to Sharp

Sharp Information Systems Europe (SISE), a division of Sharp Electronics Europe, offers a comprehensive portfolio of award-winning document management and display solutions to help organisations transform the way they engage with information. Sharp's industry-leading MFPs and high volume systems sit at the heart of integrated applications for digital transformation.

Sharp's proprietary Open Systems Architecture (OSA) technology transforms MFPs into powerful information portals, seamlessly integrating to the cloud and third-party business applications. Sharp Cloud Portal Office is an award winning document management and collaboration system designed to help small- to medium-sized businesses drive growth, improve efficiency and reduce costs.

By facilitating the transition to new equipment, methods and processes, Sharp Optimised Managed Services help improve how businesses interact with information through enhanced digital workflows and more collaborative working.

Sharp also offer a range of display solutions that include video walls for immersive entertainment, digital signage and innovative interactive touchscreens for engaging presentations.

Our mission is to develop new products that support individual expression; creating life enhancing experiences that let you be original.
