

1,1 MW project in Hungary

Case Study

Installation: Szeged, Hungary

Product: Sharp NDRJ265
Maximum Power: 265 W
Made: In Germany

Number of Modules: 4120
Total Power: 2 x 546 kWp
Project completed: June 2017

Feed-in tariff

31,48 Ft/kWh ($\approx 0,10$ €/kWh) for 25 years or 15.000 MWh. This tariff will be changed in every year by the rate of inflation.

The operator says

"The project made all the participants (investors, installers, local authorities, grid provider) satisfied. We got the panels in time, exactly when SHARP promised. It was a great help to us as well as the financial conditions.

I hope we can continue this cooperation this year, using high-quality SHARP solar panels, hopefully more than last year."

Sandor Harcsa-Pinter
Executive Director
3 Comm Line Kft.
